Market Insight

- **Australian exports to China down by 26pc, worse than any other country**

Australia's goods exports to China fell by more than 26 per cent in August, taking total exports down by 7.5 per cent over the year to \$US75.7bn (\$103.9bn), according to figures from the Customs General Administration in Beijing.

Chinese imports from Australia in August were down by 26.2 per cent to \$US8.81bn year on year in a month where total imports by China were down by 0.5 per cent.

This was a turnaround from four months of strong export sales to China from March to June.

Iron ore is the biggest single source of Australian exports to China, making up 56 per cent of all goods exports in the 2019-20 financial year.

- **China deepens reforms to invigorate businesses**

The State Council, China's cabinet, has detailed multiple reform measures to improve business environment and invigorate the market.

While China's business environment has seen remarkable progress in recent years, operational barriers still exist in the country, according to a circular released by the State Council, which listed reforms in four areas to spur business vitality.

China will push for adopting fully online procedures for starting a business in order to further reduce the time required for setting up an enterprise to no more than four working days, said the circular.

The circular pledged to simplify regulation and approval procedures while calling for new breakthroughs in the business registration system.

The power of approval for businesses related to five categories of products, including steel bars for construction purposes, will be decentralized to provincial-level market regulators.

Local authorities are urged to firmly implement the tasks, according to the circular.
